

## AMBOS 18% CALF PELLETT

A pellet for supplementary feeding young calves prior to and just after weaning to stimulate rumen development and reduce the setback often seen during weaning.

Feed to Calves from 40kg to 120kg or birth to 4 months along with hay or straw and pasture.

The feeding rate depends on the available pasture or hay quality. The pellet can be fed with no pasture and barley straw. There is **no Urea** in this pellet.

### Features

- An 18% Protein, 12.5 Mj Pellet.
- Two forms of protein meals have been added to deliver a broad amino acid profile.
- Includes Vitamins A, D3 and E, trace minerals to enhance the immune system of a young calf and macro minerals such as Calcium, Phosphorus, Magnesium, Sodium, Potassium and Sulphur are included in this pellet for skeletal growth, smooth muscle function and maintaining the electrolyte balance.
- Lucerne meal to improve palatability and to promote early intake and rumen function.

## AMBOS 16% CALF PELLETT

A pellet for supplementary feeding weaner calves and vealers up to 12 months of age.

Feed **AMBOS 16% Calf Pellet** along with hay or straw and pasture. The feeding rate depends on the available pasture or hay quality. The pellet can be fed with no pasture and barley straw.

### Features (feed to calves from 120kg – 240kg)

- A 16% protein, 12.5 Mj Pellet.
- Includes Vitamins A, D3 and E and trace and macro minerals to enhance the immune system & promote growth of a weaner calf.
- Formulated with 0.5% urea and other protein meals to stimulate a calf to eat more pasture.
- The pellet can be fed in a self feeder or put out daily in a trough.

# Superior quality pellet feeds for maximising ruminant production

**AMBOS Stockfeeds** have developed a range of quality pellet feeds to maximise ruminant production in both dairy and beef cattle. All products contain Rumensin 10% to prevent coccidiosis, bloat and improve feed conversion efficiency.

## AMBOS 14% BEEF PELLETT

A safe grain based pellet which is suitable for feeding free choice from a self feeder always allow a 14 day adjustment period for the animals to adapt to their new diet.

The self feeder should be kept full to prevent hungry cattle gorging themselves on pellets and getting acidosis.

It is a palatable pellet to be fed to stock who require supplementation due to a lack of pasture.

The pellet is designed to maintain condition if the amount offered is limited and can be fed with cereal straw if pasture is unavailable.

### Features (feed to cattle >150kg)

- A 14% Protein, 12 Mj Pellet.
- High vitamin and mineral fortification to meet growth and health requirements.
- Contains buffers to aid in prevention of lactic acidosis.
- Provides extra protein and energy during periods of feed shortages.
- Can be used to finish cattle off on pasture.

## AMBOS BEEF FINISHER PELLETT

The **Beef Finisher Pellet** can be placed into a self feeder or lick feeder after the cattle have had time to adapt to grain from 14 days until the target weight is achieved.

It is a high energy, high protein pellet designed for cattle that are growing quickly and developing muscle.

The pellet is designed to deliver optimum growth rates and feed conversion in cattle fed pasture or in a feedlot to be slaughtered.

Feed **AMBOS Beef Finisher Pellet** along with ad lib hay or straw. The feeding rate depends on the available pasture or hay quality. The pellet can be fed with no pasture and straw

### Features

- A 16% Protein, 12.5 Mj Pellet.
- High vitamin and mineral fortification to meet growth and health requirements.
- Lucerne meal to improve palatability and to promote early intake and rumen function.
- Formulated with buffers to reduce the incidence of acidosis.
- Ideal for young growing cattle as a creep feed or can be used to finish off bullocks for the Jap Ox market.
- Safe to feed ad lib provided that there is adequate dry standing feed.
- Can be used to grow out heifers to suitable joining weights.
- Suitable for use as show preparation feed.

**Warning: Inappropriate Autumn to Spring storage of feed products may promote mould**

## AMBOS CATTLE PROTEIN CONCENTRATE PELLETT

A pellet for the farmer that has his own grain and wishes to utilise this to all classes of cattle on the farm.

It enables the farmers to produce a ration without undue amounts of fines that contains all the essential additives and protein that compliments grain to meet the needs of all the cattle on the farm.

Feed **AMBOS Protein Concentrate Pellet** with grain and hay as shown in the table below.

### Features (feed to all classes of cattle after weaning age)

- A convenient pellet for easy mixing and top dressing.
- The concentrate is based on both rumen degradable and bypass protein meals.
- High vitamin and mineral fortification to meet growth and health requirements.
- Contains buffers to aid in the prevention of lactic acidosis.

Example formulations that can be produced by this protein concentrate are shown in the table below. This ration is formulated to cover the home mixers with their own grain. Best results are achieved with appropriate mixing equipment such as a mixing wagon.

PRODUCT	AMBOS CATTLE CONCENTRATE PELLETT 30%	TRITICALE, WHEAT OR BARLEY	OATS
Beef Ration 15%	20%	80%	
Beef Ration 14% <sup>a</sup>	25%		75%
